**14 November 2017**

## **Appointment of Non-Executive Chairman**

REFFIND Limited (ASX: RFN, the Company) advises that David Jackson has been appointed as the Company's Non-Executive Chairman effective today.

Mr. Jackson brings 26 years of management experience in enterprise and mobile technology, executive search and talent management with a proven track record in development and commercialization of new technologies and revenue generation.

Mr. Jackson is a founding Director of S2P Project Professionals IT Services and the founder and CEO of FundX, a marketplace invoice financing platform that is embracing big data and predictive algorithms developed with KPMG Australia to provide risk-based funding to SMEs where bank finance is unavailable or expensive.

The FundX platform is built with Blockchain's distributed ledger technology, leveraging the protection, agility and transparency of Blockchain.

Mr. Jackson is a principal investor in a wide range of compelling and early stage Blockchain and mobile technology businesses in Australia, Asia and the USA, and has over 20 years' experience founding and mentoring successful start-ups across Australia and the United States.

Mr. Jackson's passion for supporting innovation in Australia and beyond has led him to become the founder of Australia's inaugural Crypto-currency Meetup, Crypto Sydney, an active member of fintech incubator, Stone & Chalk, and tech accelerator, BlueChilli. He sits on the board of angel group Sydney Angels Inc., is a mentor at Sydney University's accelerator program, incubate.org.au, and retains a position as a non-executive director at S2M Digital after previously acting as its CEO. Prior to this, David was managing director of Global Job Network Pty Limited, and founding member of Parker Bridge Financial Recruitment.

During the 17 years he spent building the digital and technology teams of dotcom's and corporates across Australia and Asia, Mr. Jackson discovered that many of these businesses had one common problem: a lack of access to timely and affordable funding for growth or to fill cash flow gaps.

In 2015, Mr. Jackson began developing a sophisticated Blockchain technology platform that would allow Australian investors looking for new investment opportunities to connect directly to these businesses in need of funds – FundX.

The technology platform uses Blockchain, machine learning, big data, and risk-based credit decisioning software to rapidly and accurately assess the credit capacity of borrowers. From there, approval can be attained within just one minute, and funds delivered to approved applicants within 24 hours.

David holds a Bachelor of Business from the University of Newcastle.
